REPRINT POLICY

The SERA Repeater Journal is copyright 2017 by The SouthEastern Repeater Association, Inc.
Original material may not be reproduced or printed by any organization without prior consent, with proper credit.The SERA REPEATER INDEX may NOT be published or reproduced for distribution in any form, by any individual, publication, electronic source, or any other means without the expressed written consent of SERA, Inc. All other rights reserved.

SERA Membership

Full Repeater Membership

A repeater owner or club may join SERA as a Full Member if they have a properly coordinated and operating repeater on the air. A Full Membership application should be submitted online or with the application included in the Repeater Journal. A full member will receive a copy of the Repeater Journal each quarter. Full membership Representatives have voting privileges in SERA elections and may be eligible to hold elected offices within the organization. Go to www.sera.org and fill out the online applications. Full Member dues are $35.00 a year.

Associate Membership

(A Membership for Repeater Users) Amateur radio operators, especially repeater users, are invited to join SERA as Associated Members. Only $25 per years will enable you to support the organizations and receive the Repeater Journal. Associate Members may hold appointive offices within SERA, but do not have voting privileges.

Repeater Journal Mailing

The Repeater Journal is scheduled to be mailed Bulk Rate during the first week of the cover date month. Delivery usually takes one to two weeks. Notify the membership director at membership@sera.org, if
you have not received your copy by the 1st of the following month. The Repeater Journal is not forwarded to new addresses. If you move, send your new address to the membership dept!
Contact: membership@sera.org

Hello SERA Staff, Friends, and the SERA Membership,

The weather is already getting hot in South Carolina. If this is any indication of things to come, we are in for a sizzling summer. The Board of Directors meeting of the SouthEastern Repeater Association was held in Pigeon Forge, Tennessee on June 16, 17, 18. We completed our agenda in a timely fashion and the Board had Supper together on Saturday evening. It is good to see each other a couple of times a year, although we deal with each other on sometimes a daily basis over email working on what we do. (Repeater Coordinations) I appreciate all that the State Frequency Coordinators do for the hobby. They are unpaid and do what they do on a volunteer basis. Some members of our staff have been doing this a very long time and I thank you.

We are now offering "Spotlight Ads" in the Repeater Journal. These ads are business card size and will be grouped with other ads on the same page. This can be an easy and inexpensive way for you to advertise your Club, your Repeater, your Hamfest or just about anything related to Amateur Radio. The cost is just $20.00 for a one time ad or $40.00 per year which is 4 issues of the Repeater Journal. We offered this back in 2000 and it was very well received. So, take advantage of this and contact our Editor or Membership Chairman. We have already received a few requests for ads.

The SERA does not charge for Repeater Coordination. Our services are free to the Amateur community. But, we do appreciate you becoming an Associate Member, or Full Member if you own a repeater or are the trustee of a club repeater. I was asked recently about voting privileges for Associate and Full Members. Associate members do not vote, but they receive the Repeater Journal for their membership while supporting our organization. Full members are eligible to vote for their State Directors and Vice Directors. Their terms are four years. Election information can be found in the journal at the proper time.

Finally, enjoy the hobby, contact your State Director listed in the journal if you need anything,

73 Roger

When All Else Fails!

"When all else fails," is a slogan that has not endeared us to some of the agencies that we have sought to serve. On the surface it appears that we have equipment that survives and continues to function when others have failed because they are less dependable than our equipment. In reality this is not true but we have been there and continued to function when other services have failed to continue to provide communications.

Our towers or shared towers have gone down in the midst of storms just like those that we serve. A difference is that we can build a functioning antenna on site. We may then use a rope to hoist that antenna in the air from another nearby structure. We might construct this antenna from wire or a couple of 10 feet sticks of copper tubing. At the same time many agencies would contact a two-way repair vendor that may have contracts with a number of agencies and every one of these can't be first on the list for repairs. There are a number of other factors that may contribute to our ability to be a high value resource to those that depend on us.

One factor is the breath of frequencies and modes that are available to hams that can be used to restore communications. It is not unusual for a ham to have 30 or more repeaters that could be accessed from their home. We may also be able to use a number of those that are outside our jurisdiction. With agencies moving more to trunking systems, they have increased their utilization with their systems. Under normal times there is still a margin for an increase in traffic volume. With a huge increase in traffic these trunked systems may have the potential for traffic overload. This is an ideal time for hams to handle some of the less critical traffic.

There appears to be a surge with both agencies and institutions that have been sold on communications systems that are complex and Internet dependent. Amateur Radio has also taken advantage of using RF and a hybrid Internet system. Many of our digital modes have a heavy reliance on the Internet. Some of these hybrid systems have an element of strictly RF backup that allow for the functioning of the communications mode in the total absence of the Internet.

Amateur Radio appears to be taking the possibility of an EMP (Electro-Magnetic Pulse) seriously and are well positioned to have equipment that will survive. This includes hams that have gear stored in well-shielded containers. Others make a habit of disconnecting equipment from wiring and antennas when not in use. Lots of hams have older tube type equipment stored on their shelves? This tube type equipment has a much better chance of surviving an EMP than solid-state devices.

Another way of insuring our usefulness is to have Itinerant repeaters available for use in emergencies. SERA have provided frequencies for this purpose. If we have repeater loss in my area, I can drive to high mountain location and quickly place an Itinerant repeater into service. These repeaters are on 440.750 outputs and 445.750 input along with 440.800 output and 445.800 input. These repeaters do not require coordination but when they are placed in service, you should contact your SERA coordinator to inform him or her that this repeater has been placed in service and the location.

There are repeaters that have been retired from factories that can be secured for a very reasonable price and they have a build-in duplexers and 35 watts output. I carry one in my communications trailer. These may be carried up to top floors of high-rise buildings and provide wide coverage in downtown areas. The repeaters often have the ability to program in both frequency pairs and the duplexers can be tuned for 440.775/445.775 and they would only be 25 KHz off on either transmit or receive frequencies.

When given the opportunity, remind the decision makers in the agencies that you serve of ways that you can be helpful to them in times of communications emergency. Snappy slogans that may be interpreted as a put-down don't usually help.

Reporting from

As this article was being prepared for publication, Field Day was on the immediate horizon. Clubs and other groups were finalizing their participation in this nationwide event that demonstrates the value of amateur radio for communities near and far.

When our readers receive this edition Field Day will be an event in the past that hopefully left many good memories of June 2017. It is my hope that everyone enjoyed the event. Perhaps we can include some photographs of Tennessee groups in the next edition.

If you have a success story about your group's participation send some information by email so we can let our readers share in your enjoyment.

The Bristol Amateur Radio Club announced a change in the location of Field Day. After three decades at the Bristol Lifesaving Crew property the club moved this year to White Top Park.

A similar move was made last year by the Cleveland Amateur Radio Club. Their use of Red Clay State Historical Park, the last eastern capital of the Cherokee Nation before the infamous Trail of Tears, ended after several successful years when the move was made to their clubhouse in Cleveland. Red Clay is a state park on the Tennessee-Georgia border and was also used during the National Parks on the Air as a special event station.

The Bristol club provided the following link to view a report on WCYB TV of their 2016 Field Day: http://www.wcyb.com/news/video/amateur-radio-field-day-reaches-places-world-wide-_20160803022747392/42462058.

The Cleveland Amateur Radio Club has the 146.925 Mhz repeater on the air after a problem while adjusting the antenna left it damaged and repeater off the air. That problem was corrected with a new antenna and it returned to the air before preparation of this article.

That repeater hosts the Bradley County ACS / ARES Emergency Services Net where Derek Wooley KD5UBL is usually found behind the mike serving as net control.

Till next time, 73's from Tennessee.

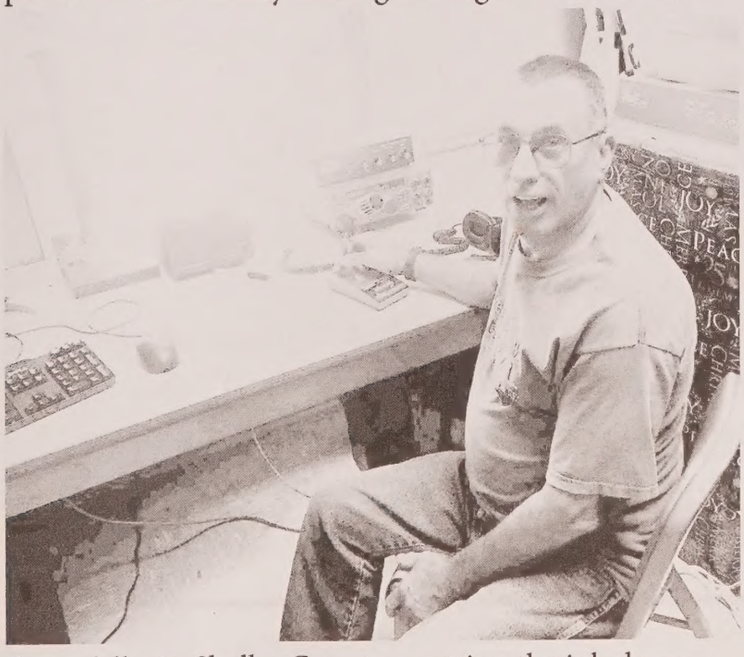
Reporting from

Kentucky

Buddy Sohl KC4WQ

Hello again from the Bluegrass State. I hope everyone's summer has been uneventful thunderstorm wise. There has been some decent sporadic E activity this summer but it always seems the clouds form above my location and everyone else gets the advantage.

As this is being written the annual ARRL Field Day has just wrapped up. Conditions were interesting to say the least. On Saturday, propagation was non-existent on 10 and 15 meters. But 20m was long and short at the same time and signals were consistent and strong. Sunday was entirely different. Ten and Fifteen meters were like 20 the day before. Lots of strange, strong, short skip with some good signals to the west coast. The Bullitt ARS operated 2F and ended up with over 1700 Q's and an estimated 8,000 Field Day points. The weather was phenomenal for field day as well. Temperatures were 'chilly' during the night. Who'd have



those folks in Shelby County... getting the job done right.

There is a new amateur radio group forming in Laurel County. If you're in that neck of the woods and would like more information contact Shawn Cowden, KG4KBU, 606-620-4228 (shawncowden@gmail.com). They held their first meeting June 13 at the Laurel County EOC with eight interested parties in attendance. That's a good start. This group has hit the ground running too. They didn't let Field Day pass without throwing their hat in the ring. Shawn reports that 10-15 showed up at their field day site and participation looks promising. The club has been named the Southeast Kentucky ARC and have started a Facebook page. Check them out at https://www.facebook.com/groups/102764330339281/.

Paintsville ARC ham radio class 2017

The Paintsville ARC has been holding an entry level ham radio class. Kudos to Ken Robinson K4KBR, Curt Meade KY4CM and Ross Leedy KJ4GRJ for stepping up to teach and keep amateur radio fresh. What have you or your radio club done recently to introduce amateur radio to new prospects? In particular, we should look toward the youth in our communities. Ham radio can be as exciting as you want to make it but we need to get that across to our young folks in a way they can relate and appreciate. The ARRL has some excellent materials that can be used to introduce the younger set to our avocation.

Sad and happy news from eastern Kentucky. Fred Jones WA4SWF has decided to hang up his ARES amateur radio activities after many decades of service. During his ARES career he has held the positions of DEC, OES, OBS, AEC and ASM, and, as to not give local support, he has been Vice-President of the Big Sandy Amateur Radio Club and ***Continued on 8***

Continued from 7

just this year retired as Treasurer. Fred became the first Director for the South East Repeater Association (SERA) for Kentucky and was instrumental in setting up the standards we now use in repeater coordination. He then went on to serve as editor of the SERA Journal. Thank you for your nearly 40 years of service Fred, sad to see you go but happy you've provided so much, to so many, for many, many years. Enjoy your free time. I'm certain you won't be too far away.

So, what mark will your life leave on amateur radio? Our avocation is important to the health of our society at its' most critical times. So, learn what it means to be a well rounded amateur radio operator and pass that information on to a younger version of yourself. Train your replacement.

Photo credits KC4WQ, WA4SWF

A BIG thank you to our advertisers for supporting SERA.
And we ask our members to please support our advertisers.

We're always looking for interesting photos of repeater sights, towers, repeaters. Send photos to *editor@sera.org*

Get The Journal

The Repeater Journal is mailed four times every year to members of The Southeastern Repeater Association. By joining SERA as a Full Member (repeater owner) or as an Associate Member (repeater user) you will be assured of getting this valuable magazine every quarter. The Repeater Journal is well worth the annual membership fee (just pennies a day), and you are also supporting a very worthwhile cause - the orderly and efficient coordination of our VHF/UHF repeater spectrum. If you have membership questions, feel free to inquire to membership@sera.org.

It's That Time of Year Again!

Attention Repeater Owners and Club Repeater Trustees

To maintain the frequency coordination of your repeater, you must recertify its operation annually. Failure to recertify your repeater may result in loss of your repeater's frequency coordination.

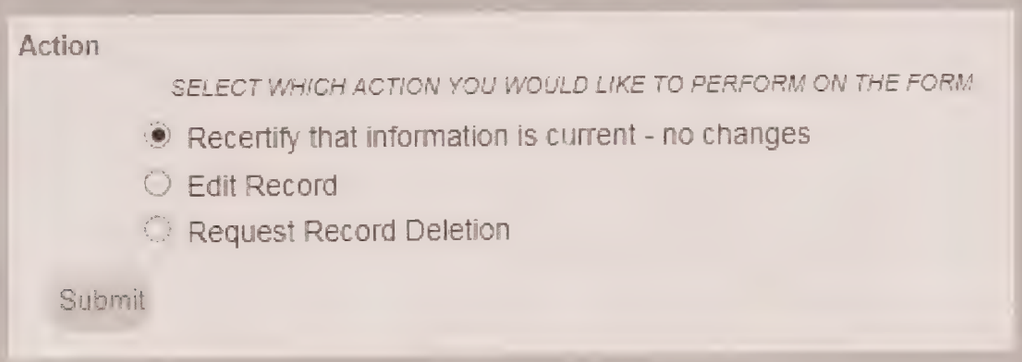
The SERA Coordination Policies and Guidelines, Policy13 states, ***if the repeater owner or trustee of record fails to keep the SERA UCS current for a period of two consecutive years, the SERA shall automatically de-coordinate the frequency pair.***

Recertifying your repeater is easy to do and a few clicks online and you're done. Go to www.sera.org and click on **Frequency Coordination** at the top of the page. If you have already registered in the SERA Universal Coordination System (UCS), the click on the **Repeater System Login Page** and login with your callsign and password.

*If you have not yet registered, click on **Repeater System Registration Page**, fill out the information, then login as above and you will be able to see any repeaters listed under your callsign.*

After selecting any of your repeaters, review all of the information in the record. If you need to change any info, click on Edit Record at the bottom of the page, update any information and click Submit.

If all information is correct, select **Recertify that information is correct – no changes** and **Submit** to complete.



Action
SELECT WHICH ACTION YOU WOULD LIKE TO PERFORM ON THE FORM
Recertify that information is current - no changes
Edit Record
Request Record Deletion
Submit

It's now easier than ever to maintain your repeater's frequency coordination. Please complete your recertification by December 31, 2017. If you have any questions or have any difficulty, contact your state Director or Vice-Director. They will be glad to assist you.

IS YOUR REPEATER MISSING FROM THE LIST?

If your repeater is not shown in the REPEATER LISTING in this issue, it may have been subject to DE-COORDINATION due to failure to maintain your repeater information for over two years as required. The SERA Coordination Policy & Guidelines require the Holder of Record (Trustee) for each repeater to maintain and certify current information about the repeater and the Holder of Record on an annual basis to maintain coordination. Failure to do so for two consecutive years will result in de-coordination.

What can you do?

If your repeater is still in operation and your repeater was not listed, contact your State Director or Vice Director listed in this issue immediately. They will assist you in registering on the SERA Universal Coordination System (UCS) and updating your information to re-coordinate your repeater. Remember, at the end of each year, you must certify that your repeater is still on the air and operating according to the technical parameters of your coordination. Certification each year is an easy, online process with only one click.

Why should a repeater be coordinated with SERA?

The Southeastern Repeater Association is the official frequency coordination organization for the eight southeastern states and maintains a database of coordinated repeaters in these areas. Repeater coordination is a voluntary process, but essential to ensure that your repeater should not interfere with another repeater or receive interference. In most cases of interference between a coordinated and uncoordinated repeater, the FCC will side with the coordinated repeater since a significant effort has been made to operate without interference to others.

Do you have to join SERA to be coordinated?

No. Membership in the SERA is not required to coordinate a repeater. Your support of the SERA is encouraged to cover the expenses of coordination and maintain the UCS system and equipment. Membership information can be found throughout the Repeater Journal or at our website, www.sera.org.

The Official SERA Repeater Index

The listing of repeaters in this issue represents the OFFICIAL information contained in the SERA Universal Co-ordination System (UCS) database. It is the responsibility of each repeater owner or Trustee to keep this information up to date to maintain coordinated status for your repeater. To maintain this information and coordinated status, the repeater owner or Trustee must first register in UCS. If you have not registered, go to http://www.sera.org and follow the instructions to register in UCS. Once registered, you may view information on repeaters where you are the owner or Trustee.

Annual Repeater Datasheets are no longer mailed. Instead, an easier online system to verify your repeater information and certify its operation is available to registered repeater owners and Trustees. (UCS) Each year ALL repeater owners and Trustees must review and certify their repeater records in UCS and certify operation. As stated in the SERA Coordination Policies & Guidelines (CP&G), failure to certify repeater information for two consecutive years WILL result in automatic de-coordination. This is a situation that can be fixed on line or by contacting your state's Director or Vice Director. They are listed by state in the Repeater Journal and at www.sera.org.

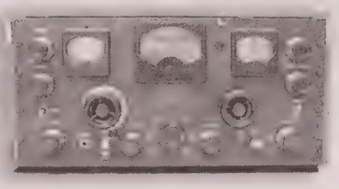
Nostalgic Wavelengths



"Early Six Meter DX"
<d.bower@ieee.org>

Back about 1960, I remember the distant "CQ" from LU3EX in Argentina breaking the silence of my six meter receiver. Now my six meter receiver was nothing to brag about. It was a simple 5 tube AC-DC AM broadcast receiver. Coupled to it, an International Crystal FCV-1 converter got me up in the VHF range. The antenna was a homebrew ground plane constructed from some pieces of surplus tubing and a washing machine pulley. A rubber gasket in the center of the pulley supported the vertical radiator. Later one of my ham buddies, K4WOE, presented me with a six meter folded dipole to help my DX. I mounted the dipole outside my window on a piece of scrap wood, and secured it to a pipe flange. I used a simple rope attachment to "rotate" the dipole from my bedroom window. In the shack, a crude home-constructed six meter rig with a 2E26 final gave me about 15 watts input. The AM modulator used a single 6V6 output tube with 12AT7 speech amplifier and completed the transmitting system. I was hearing the station in Argentina during the waning sunspot cycle that gave amateurs lots of F2 propagation. I didn't snag him, but I sure tried!! As my station improved in the following months, I was successful in working a number of states, and few foreign countries. But the propagation mode was E-skip, and I never really savored the true excitement of F2 skip on six as this solar cycle was declining.

As a teenager, I never had enough liquid funds to purchase any really neat commercial gear being manufactured by such companies as Collins. Speaking of Collins, the Clegg company introduced a series of VHF equipment that compared to Collins in quality and performance. I remember the Zeus, Venus, Apollo, and the more economical transceiver; the Clegg '99er. I could never afford any of these items.

Moving forward, to the early 1990s, I was browsing the Oak Ridge, Tennessee Hamfest and encountered a 'lonely' Clegg Venus occupying a flea market table. After much thought and inspection of this tempting piece of equipment, I decided to give it a home and plunked down the forty dollar asking price. The transceiver 'rested' in my shack for several months, and one day I decided to fire it up. I spent a little time cleaning the Venus and performing some basic alignment on the ancient piece of equipment. Initially, it seemed in fairly good working order. So I decided to throw up a six meter dipole and let it warm up the 'ionosphere.' Guess what? No RF output. After a little investigation, I found the culprit. A loose plate connection on the final amplifier vacuum tube was the problem. I'd encountered this kind of thing before, so I got out my trusty soldering gun and fixed the problem with the tube. As luck would have it, I worked several New England stations with this newly restored relic from the past. And the fun started to come back, with more DX following.

The Clegg Venus was a really fantastic transceiver for its day. It ran 85 watts PEP on sideband, and somewhat less on AM. It had a broad tuning dial that was well calibrated and covered the band up to about 50.45 megacycles. But that was OK. That's where most of the DX was found. Unlike modern all mode transceivers, the Venus had a number of adjustments for proper operation. The final had to be "dipped," and the loading matched to the antenna. Additionally, for SSB operation, carrier insertion had to be minimized. Sure it had more adjustments; but that's what made it fun. Several years lapsed and during this period of time I was inactive on 6 meters, but I was dreaming of something like a more 'modern' transceiver such as a Japan Radio Company JST-245 or Yaesu FT-920 (in addition to HF, they covered six meters). After all, I really wanted a rig such as the Venus back in the 1960s when I still had more hair, was less massive and had very little money. Maybe the time is ripe and I'll, vicariously, get to experience the thrill of my youth through more 'modern' equipment. But I would miss all the neat controls from the 1960s, now replaced with lots of memories and a microprocessor to think for me.
But that's progress! The 'dream' Continued on 52

Continued from 51

continued but was put on the back burner again for reasons not under my control. The 'dream' did finally become a reality when I found a used JRC JST-245 at the Charlotte, NC Hamfest in good condition. Finally, in the early years of the new century, I was now into retirement and had more time. The marriage of a new 6 meter antenna on a relatively tall tower with the JRC was finally in place and boy did the good DX start to be worked in Europe, South America and other distant places. As I advanced with newer equipment acquisitions, an ICOM 756 PROIII along with a Tokyo HY-Power amplifier was added to my station. But the JRC transceiver still remained in my shack. And, yes, I did add an 'LU' in Argentina to my list of new countries on 6 meters. But that long ago memory of hearing LU3EX back in the 1960s still remains as a treasured memory.

Tom Power W8RED
w8red@sera.org

Greetings from Georgia:
It is early June as I write this. Our editor of the Journal decided to see if you guys and gals where paying attention last issue, so this column has updated info from both the May and this issue. As you do repeater work over the late summer and fall keep the SERA Journal in mind and get some pictures and some publicity for your repeater systems. It is also hamfest season, so if you do a forum or other presentation on repeater related topics, please take some pictures and do a short write-up on it for inclusion here or a full article for the SERA journal outside of this column.

Club Plug:
The folks over at Silver Comet Amateur Radio Society (W4RSC) have been sending in their newsletter and information to SERA and this column for the last few months. Thanks and Kudos for a great newsletter! If you are in the Paulding County Georgia area, give this group a look at their website http://www.silvercometars.com/ and the WX4PCA and WB4QOJ repeaters.

Some Repeater news from Paulding County:
The guys out in Paulding County have been busy the last few months with repeater work....146.955/443.475....Sunday we met at the repeater site and Neal had completed the upgrade to the duplexer harness with a new harness made from small Heliax...nice job Neal. After the duplexer was retuned the insertion loss and isolation is now at manufacture spec. The question about the antenna was checked and the SWR is perfect. Neal replaced the synthesizer module also on the Master 3 repeater shelf. Dan W4DTO went to the West end repeater site and replaced the fan on the D-Star 2 meter repeater PA. So WC4PCA 2 meter D-Star is back on line at 100 watts. WX4PCA D-Star VHF is linked to REFLECTOR 30B . Also, Dan installed an APC Battery backup 900 watt unit and interfaced that into the D-Star gateway Linux computer. That computer also holds the PLD-ARES Ratflector. So that UPS runs the Linux D-Star Gateway/PLD-ARES Ratflector, Ethernet Switch the Raspberry-PI and that runs the Allstar node on 443.475 analog at the same site. Dan can also monitor the line voltage/alarms and backup status remotely thru the APC UPS software. 443.475 repeater Allstar node #43287, 146.955 repeater EchoLink node #3026
Both repeaters linked 7x24 365. RF only footprint is from the Alabama line West to Cobb County/Roswell East to Canton North up I-75 to South of the Atlanta Airport past I-285. So now World Wide linking is also available on each machine.

Bees at 400 foot AGL??
A little tid bit if you do/don't climb tall towers from Drew KK4CHP he passed along: Yes there are swarms of bees at the top of a 400 foot tower that will swarm you, while you are trying to replace an N connector on 7/8 hardline. He said he heard stories of guys always carrying a can of Raid on their climbs...he now knows why. Thanks Drew for the story/tip/reminder.

Some Repeater news from Athens GA Area:
K4TQU Athens/Crawford has new repeater and controller:
We have installed a new Kenwood tkr-750 repeater running at 25 watts with a Acrom Rc210 controller on the K4tqu repeater Athens/Crawford 147.375+ pl 127.5. Any comments or suggestions about repeater can be send to Robert Johnson ke4gvx at nameisrcj@yahoo.com
The repeater has good coverage of the Athens, GA area. It is an open repeater and welcome to all .

Icom D-Star Repeater Offer Extended through 09/30/17:
Icom has run this special in the past and now it is good through September 2017 on new D-Star Repeaters. About 60% off the original street price on D-star repeaters by ordering direct with Icom. Take a look here: http://www.icomamerica.com/en/amateur/BuyDirect/d-star/default.aspx

For you Kenwood Fans: Kenwood has released a new

mid-tier range of digital radios that do either NXDN OR DMR in the NX-3000 mobile or NX-3000 portable lines. For DMR users they do DMR Tier II & Site Roaming. Please note these are LMR (Commercial lines) and not ham radio lines so they will be available from a commercial Kenwood dealer and not your local ham store. Read more at: http://comms.kenwood.com

DMR FANS: Hytera (http://www.hytera.us/) announced a new DMR repeater that also has LTE incorporated in it. Still "demo-ware" and due for release in the latter part of 2017 but the rumor has it that will also use/be available in the 3.5ghz and 5ghz unlicensed bands for LTE, so the LTE side may have some ham radio applications for high speed data. They also announced a combo DMR/LTE radio. Be interesting to follow this development if you are a digital repeater user.

As you work on your repeaters this summer and fall, do club meetings, events and public service using your repeaters, please remember to send any repeater news, pictures, tips or other information for inclusion in this column to w8red@sera.org. Thanks!

Until next time, remember this is a hobby, have fun, and take care,
Tom Power

Inside the Clegg Venus showing the final amplifier tube. The final amplifier tube is in the cage at bottom right. As mentioned in the article, the plate wire coming out of the top of the tube had to be soldered back to the metal plate cap. The metal clip, connecting to the circuitry, is attached to the plate tube cap.

3. One of the homebrew 6 meter transmitters I used back in the 1960s.

4. The JRC JST-245 still 'rests' in my shack and is sometimes used.

5. The ICOM 756 PROIII with Tokyo HY-POWER solid state amplifier helps keep the 6 meter dream alive from the 1960s, in 2017.

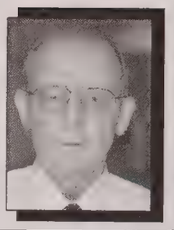
Elkins, WV 26241
ad8t@sera.org



Greetings readers. I hope you are having a good summer. I am simply not accepting that it will soon be over. We have been having some good openings on the higher HF bands. For the last several weeks I have noticed the bacons coming in on 10 m (between 28.2 - 28.3 MHz). I have been monitoring these for so many years that many of them are like old friends. I don't have to look them up to know where they are, and how many watts they are putting out. There have also been typical summer openings on VHF, but I haven't seen anything extreme, just openings that let you hear distant repeaters on local repeater frequencies where they're normally not heard.

One of the clubs I belong to had another good Field Day--not much in the way of contacts, but good fellowship and good food. One thing I found interesting this year, because I finally took time to examine it instead of operating, was the mil surplus self-erecting mast. SEE IMAGE.

You can read about this ingenious piece of equipment by looking up AB-577/GRC Mast. It has a winch and a raising fixture called a "launcher" that enables the operator WITH THE PROPER GUYS AND ANCHORS to add sections of 5' diameter aluminum tubing, clamp them on, and keep raising them up to 48 feet, or 75 feet with five optional mast sections. They are still available mil surplus but it seems the complete original packages with all components, are hard to come by. If you can find a 100% complete kit it will probably cost you over a thousand bucks. I watched KD8MIV operate it by adding sections. It had already been basically setup, anchored, and guyed. It is a thing of mechanical beauty, never mind the great useful height it can achieve for an antenna or center support in the middle of a field, as we had at Field Day. There is a set of close-up photos of the unassembled unit here: http://www.qsl.net/k4mg/MilitaryMastBig/MilitaryMastBig.htm

Incidentally, the station with the most-transmitters that I worked this year was 8A. In the past I have worked more than one 14A several times. We were 2A which is normal for this club. Can you imagine trying to operate 14 transmitters within a 1000 foot radius, even if they are on different bands? Sheeesh.

From what I'm seeing, 2 meter activity has dropped off in the last year. Fusion digital (and presumably other DV modes) brought a spike in activity, but the novelty seems to have worn off, at least in my area. The weekly nets are well-attended, but daily, random QSOs are few and far between in my area. How about yours?

With few exceptions here, people are not using VHF/UHF digital voice for daily QSOs; they are only using it for weekly nets. At this point I still have 3 Fusion machines within

Continued on 57

Continued from 57

range, and the Hamtalk system which is not digital but links nine 2 meter machines and two 6 meter ones. It covers a good part of the state. If you overlay all the coverage maps of the individual machines, the Hamtalk system looks like the attached image. Our thanks to N8FMD, KC8AJH and assistants.

The Hamtalk system works very well, and I can hit several links from my house, one or two with a handheld.

I'm going to be getting back into packet radio thanks to N8ER who provided some gear. I was a faithful user when I was a county EC. I know some say packet's dead, but they even say that about 2 meters. It may be dead in places, but not here. And my opinion of one thing that severely wounded if not killed, packet around here was the strong admonition not to communicate directly keyboard-to-keyboard. Many users did not like the Bulletin Board-only model, which is delayed in time. They wanted to talk in real time to other hams like ALL other modes, so they got disillusioned and dropped out. Maybe this was not the case in your area, but it was where I am.

My state has a Digital Amateur Radio Emergency Network (DAREN) which was profiled in the SERA Journal some time ago. There are nodes in many (but not all) county comm centers/OEMSs etc. WA8LLM Ken Harris was largely responsible for setting up this system, and it is still very much alive. So what radio projects or interests are you spending your time with? Friend Tom AC8HQ has become expert with Arduino processors and various apps for satellite tracking. Send me an email. 73, Mo AD8T@sera.org

South Carolina News

Les Shattuck, K4NK

South Carolina News
SERA Journal Summer 2017

Summer is here in a big way, the humidity is getting higher and uncomfortable outside. As I write this column I must say that I have not been able to get a lot of news from various club newsletters. Here in Anderson the club is getting ready for field day as are many other clubs and groups. It seems that activity on the Anderson repeaters is down quite a bit with only a few check-ins to the net each night.

Let's move on... If you are vacationing as many do, in the Myrtle beach area try these repeaters they have nets and you can meet some of the locals. 444.675 pl 85.4 tues. at 8pm; 146.805 on thurs. at 8pm; 147.120 Sat. at 8pm. and 145.110 Sundays at 8pm. All the Grand Strand repeaters use the same pl. code 85.4.

Also down in the low country The Charleston A.R.S. news letter reports on having several Emergency Prep. exercises. They are always on alert during the hurricane season. Skywatch training is also on going.

The Greenwood club newsletter has a great article in the May edition on APCO P-25, the June issue is about Multi Mode Digital Voice Modems. You can read these yourself by Going to Goggle and typing Greenwood Radio Club SC. If you are with-in range the club net is on Thursday night on 147.165 +

The Upstate Ham Fest is now history but the Blue Ridge club in Greenville thanks all who attended. A good turn out despite windy conditions. Skywarn training also still on going, check out the 146.610 repeater at 9 pm each night (no tone) they can also be accessed by echo link.

I am a bit confused as to what is happening to the SC hearts group since the loss of John Crockett W3KH. Evidently a lot of changes. Perhaps some one can fill me in for the next column.

Here's hoping you have a great summer and don't forget to take your 2 meter and 440 handhelds along on vacation. You never know who you might meet and can make some new radio friends.

73 for now Les K4NK

Guest Column

Creating Resiliency in Amateur Radio

Matthew Littleton- KN4SWB

I started out writing an article about my response to the Pinnacle Mountain Wildfire in South Carolina last November. Those of you who know me know that I love to talk about EMCOMM and things we as amateurs can do to make ourselves invaluable to Emergency Communications. One major component of Emergency Communications is resiliency and making sure we have multiple layers of redundancy (including equipment and people). However, an email exchange between myself and our SERA President Roger Gregory made me think about something else. You see, while it is our job to create redundancy, it is equally important for us to learn other jobs performed by other people within amateur radio. I am specifically writing about my experiences as the Vice Director for South Carolina while John Crockett (W3KH/SK) was Director. By the time you read this article, John will have been gone for over a year now, and I will have been the State Director for almost a year.

John Crockett (W3KH/SK) was the South Carolina State Director for SERA and arguably did more for amateur radio in South Carolina than any other single person over the last 20 years. John was a mentor of mine and a close personal friend.

Continued on 59

Continued from 58

The last time I saw John was a short time before he died at Gene Retske's (W4DSN) along with Roger Mull (KD4JQJ). We spent a couple of hours talking and laughing, but we did not talk about anything he was responsible for or, "passing the torch". Little did I know that would be the last conversation I had with him and I am thankful for Gene and Roger setting that meeting up. As the Vice Director, I found that John handled most things SERA related and I never knew about issues, questions, or suggestions. It became increasingly clear as I moved in to the Director's position. You see, John had relationships with so many of you reading this article which he had built over decades of amateur radio work. My relationships were more connected with Public Safety communications and I'm learning to build relationships within the amateur radio community across more than just the upstate. It was easy for John to handle things (at least he made it look easy) because of these relationships and his passion for amateur radio.

I spend a lot of time speaking and writing about resiliency and Continuity of Operations Plans (CoOP) and I emphasize how people need to teach their jobs to other people. However, having lost John, I will be adding encouragement for people to take more initiative to learn other jobs in Emergency Communications instead of waiting on somebody to teach them. You see, I could have made more of an effort to learn more from John long before he passed, but I was complacent with knowing he was going to take care of things.

So, as you read this article, I am going to issue all of us a challenge. Col Hal Moore is credited with the statement, "You will learn the job of the guy above you, and you will teach your job to the job below you." I am going to not only learn more about the job John did for SERA and South Carolina, but I am going to teach others to do the same. And I challenge you to follow suit. Maybe you are the only one who knows where and how to work on your repeater. Maybe it is time to show somebody else where and how to access the repeater. How many Technician only hams are there in your club? Maybe it is time you expose them to HF? There are many things within amateur radio we can each teach somebody else just as there are many things within amateur radio we can learn from others. How do you know somebody is unwilling to learn if you have never tried to teach them? Better yet, maybe it is time you learn about some of the digital modes on HF or check in to a net on another club's repeater? Maybe it is time to venture off to another band other than 2-meters? In any case, make a difference and leave a legacy that can be built upon by the next guy.

I hope all of you will take the time to reflect on these thoughts and I hope my efforts honor John's legacy. Never stop learning and never stop teaching! 73's

The SERA Journal is looking for interesting articles about RF communications, repeaters and repeater systems. With thousands of repeaters out there, there is surely a good tale or two. And we would like to share your stories and experiences with our SERA community. A good article might be about getting kicked off a site for some odd reason and how you went about finding a new site. Maybe about how you have overcome problems with lightning. And of course there are the stories about linking for better coverage. If your system is being used for FM Digital, we would like to hear about how passing digital messages had effected you system. What have you done to harden you communications system against environmental elements? Please share with our hundreds of members. And look to the Journal for articles that might just help you solve a problem one of these days. ***And don't forget those cover photos with a short description!***
73 and thanks in advance.
Norm, WA4ZXV, SERA Journal Editor

User Instructions for SERA UCS

Thanks to the hard work of our SERA Director of UCS Technology, you can now handle all your coordination and fact finding at www.sera.org Thanks Shaun Bennett.

GET REGISTERED IN UCS: You must first register your call (or club Trustee call, if a club license) in UCS at www.sera.org and look in Tools. The SERA UCS system will e-mail a password to the e-mail address you entered. There is also the option to retrieve a forgotten password.

PROFILE / REPEATER LISTING UPDATES AND CHANGES: After you are logged in you can change or update. Your login will consist of your Call Sign and the password sent to you by UCS or the password of your choice. Ex/ login K4EZ password 12345

HOWDY: In the upper right corner of this screen, you should see "Howdy," and your name. Place your mouse over your name and the area will drop down and reveal the choices. Select "Edit My Profile" to go to that area. In the PROFILE page you should enter your contact information and the other required information. When complete, click UPDATE PROFILE located at the bottom of the page and exit the Profile Section.

COORDINATION TOOLS: Click on Universal Coordination System Tools. From here you can either EDIT your repeater record or SUBMIT a new request. You must be the trustee of the repeater call to make access or make changes to a coordination. Click on the ID number to see the repeater data. Be sure to provide information such as antenna db and feed line type, etc. Email, telephone, etc., should also be completed. At the bottom of the page you can select EDIT RECORD and SUBMIT the changes you made. Note that some fields are required and designated by a red asterisk. Lots of people enter their information and do not click on SUBMIT. If you do not do this you will have to re-enter your entries or changes.

ADDITIONAL COMMENTS: This is a required field and something must be entered. If you made minor informational changes add a statement something like "updating information" or a note to your coordinator or coordination that will be helpful.

REVIEW: When complete you can take a look and the system will process the new information.

SUBMIT: If all is OK at this point you should click on SUBMIT and your information or coordination request will be uploaded and your coordinator alerted with a copy.

YOU MUST DO THIS FOR EACH REPEATER LISTED UNDER YOUR CALL You will receive a return email from UCS noting that you have made changes and that your "Application for Frequency Coordination has been submitted." Remember, the TRUSTEE of the repeater is responsible for keeping the records current in the SERA UCS and also with the FCC. If your Club Trustee changes, the information must also be changed with the FCC or UCS will generate an error to the coordinators. Trustee rules are defined by the FCC and not SERA and they are specific.

SERA MEMBERSHIP: **You can also sign up for your SERA membership on the website. Click on the Membership header.** You can join our group on line or with the traditional paper method.

SERA Journal
Hamfest Calendar

Tom Power
hamfest@sera.org

Hamfests, Conventions, and Events for 2017

Take Note: A bunch of updates since the last SERA Journal Issue:

The below calendar is published as a service to SERA Members in our eight state region.
We also include events in our neighboring non-SERA states that our members frequently attend. If you or your club would like your hamfest, convention, or event to be included in this list, please send your details via email to hamfest@sera.org. Also if you find errors in a listing, please send in your corrections. Submission deadlines for the SERA Journal issues are listed below. Lastly, if you attend one of these hamfests/events please let the sponsors know you saw it in the SERA Journal.

Also remember, SERA offers full advertising in the SERA Journal beyond these listings.
For display advertising rates and info please email advertising@sera.org

And lastly, if you do a presentation or a technical forum on a repeater technology at the hamfest, or have "Repeater Related" news of the event, please take pictures and do a small write-up and submit that article to editor@sera.org for possible inclusion in news in the SERA Journal for our members.

SERA Journal Quarterly Issues and Deadlines for Submissions:

ISSUE	Final Material Submission Deadline
November 2017	09/10/17
February 2018	12/10/17

Journal Mailing

If you should change your mailing address, please notify us at membership@sera.org so that we may update our mailing files. The Repeater Journal is not normally forwarded by the U.S. Postal Service, because it is sent by third class mail. As a rule we do request "address correction" when we conduct our mailings, but we do not always receive those updates from the USPS.

ADVERTISING SIZES AND RATES

Effective February 1, 2010
Full Color Covers 8.125x10.75"(+.125 bleed) $425
Full Page 7.25x9.875" $160
Two Page Spread $360
Full Page Bleed 8.125x10.75"(+.125 bleed) $160
2/3 Page Vertical 4.75 x 9.875" $120
2/3 Page Horizontal 7.25 x 4.875" $88
1/2 Page Vertical 4.75 x 7.25" $88
1/2 Page Vertical 3.5 x 9.875" $88
1/3 Page Horizontal 4.75 x 5.0" $65
1/3 Page Horizontal 7.25 x 3.25" $65
1/3 Page Vertical 2.25 x 9.875" $65
1/4 Page Horizontal 4.75 x 3.75" $52
1/4 Page Horizontal 7.25 x 2.25" $52
1/4 Page Vertical 3.5 x 4.875" $52
1/6 Page Horizontal 2.25 x 4.875" $36
1/12 Page Vertical 2.25 x 2.5 $20
Spotlight Page 2.25 x 1.25" (3 issues) $30

INVOICING AND AD INSERTION ORDERS

Dealers: Quarterly dealer invoices, after insertion, will request information pertaining to future insertions. If no instructions on the *paid* invoice copy are received, the ad will be *repeated* and invoiced the following quarter.

Hamfests: Advertising must be ordered each edition for insertion. Payment must
accompany insertion order/advertising copy for Hamfest ads.

ADVERTISING PAYMENT POLICY

ADVERTISING INVOICES are due upon receipt. Unpaid invoices will require us to
withhold publication of any additional ads until account is paid in full. First time advertisers, Hamfest advertising, and Spotlight Page advertising is to be paid in advance. Please submit a check with order.

SPECIFICATIONS & GENERAL

ADVERTISING SIZES are listed above. Ads that do not fit dimensions will be adjusted at no charge.
Digital copy is preferred, but hard copy is acceptable. Contact the editor for details.

FULL COLOR COVER ADS, when available, are to be sized for full 8.125 x 10.75 + bleed.
High resolution PDF preferred.

Get The Journal

The Repeater Journal is mailed four times every year to members of The Southeastern Repeater Association. By joining SERA as a Full Member (repeater owner) or as an Associate Member (repeater user) you will be assured of getting this valuable magazine every quarter. The Repeater Journal is well worth the annual membership fee (just pennies a day), and you are also supporting a very worthwhile cause - the orderly and efficient coordination of our VHF/UHF repeater spectrum. If you have membership questions, feel free to inquire to membership@sera.org.

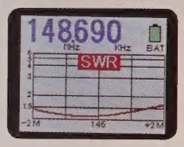
New from COMET!
CAA-500MarkII Antenna Analyzer
1.8-500MHz

The CAA-500MarkII combines the simplicity and accuracy of an analog instrument, PLUS... a full color LCD graphic display • Resistive (R) and Reactive (X) components of impedance graphed and displayed numerically • SWR readings in both graphic and numerical results.

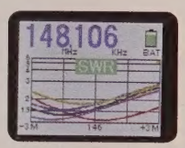
Functions:
In addition to the display of antenna properties, SWR curves are plotted quickly, easily and accurately!

Auto band-sweep function:
Switch to the amateur band of choice and press "Sweep Center". The chosen band is swept and the SWR graphed in seconds!



Manual band-sweep function:
Select the band, select the center frequency, and select the bandwidth. Manually sweep the chosen frequency range and display the SWR graph.

Multiple Manual Band-Sweeps
Manually graph the user defined bandwidth multiple times and see the results overlaid in 5 selectable colors! Make antenna length, position, height above ground, gamma match adjustments, etc... and graph each adjustment in seconds, in a new color, without losing the previous graph!



The perfect combination of analog and graphic information, designed in particular for antenna diagnostics and adjustments while on the roof, tower or in the field!

Features:
Operates on 8-16VDC external power, 6 AA Alkaline or NiMH rechargeable cells • Trickle charger built in (only when using NiMH batteries) • Typical battery life: 9 hours of continuous operation • Battery level indicator • Selectable auto power-off time limit preserves battery capacity • SO-239 connector for 1.8-300MHz range • N-female connector for 300-500MHz range • Optional soft carry case sold separately: CAA-5SC

Call or visit your local dealer today!
